# TRAFFIC PAINT

Traffic Paint Truck Mounted Stripers

# There's an invisible line between ordinary We believe performance-driven

- Designed by experienced striping professionals with careful consideration given to high volume output capability, service-ability, ease of operation and dependability.
- Heavy duty construction to assure long service life and reduce overall maintenance.
- High volume hydraulic and material delivery system enables simultaneous application of centerline and edgeline markings.
- Comprehensive parts and service manuals with general operation instructions, troubleshooting guide and specific systems and component information.

Vacuum bead loading system.

Stainless steel paint tanks with hydraulically driven stainless steel agitators.

Canopy to protect equipment and operators.

Thermostatically controlled material heating system to provide accurate material viscosity control.

Safety and warning light package.

Combination English/Metric stripe control system.

Equipped with electronically controlled linear actuators for fast line width control without tools.

Gun actuation solenoids protected from the elements.

## Traffic Paint Truck

and extraordinary.

engineering and innovative design make the difference.

- Large inventory of replacement parts at factory with trained staff support.
- Expert service technicians available for operational training and quality “after the sale” support.

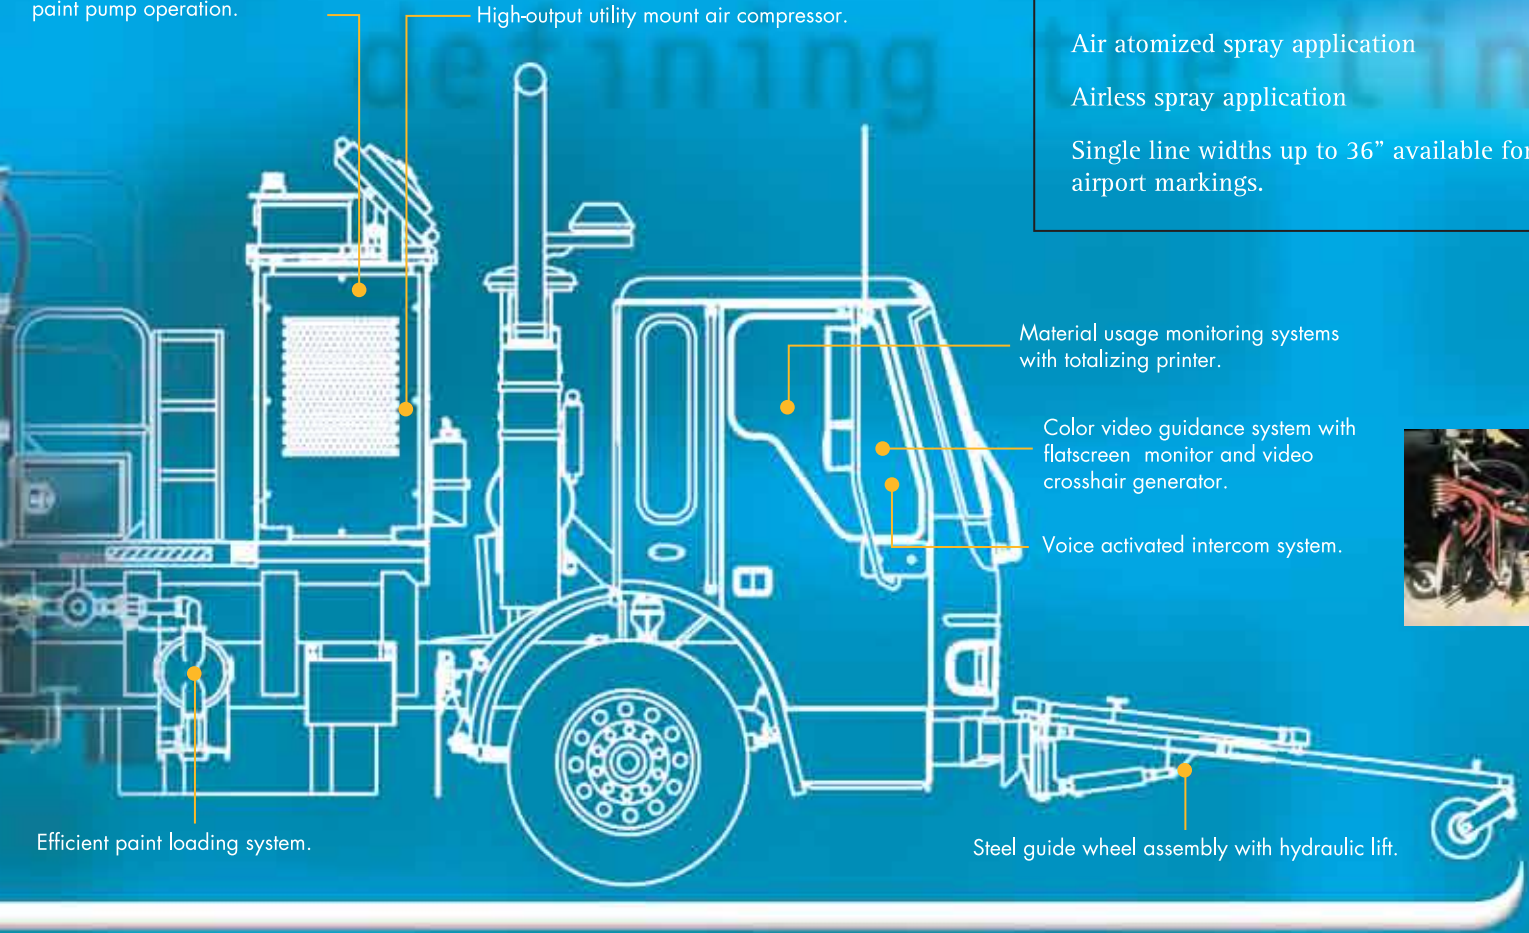

High capacity hydraulics to enable maximum simultaneous (yellow & white) paint pump operation.

High-output utility mount air compressor.

**Pump Or Pressure Tank**

**SYSTEMS available to provide:**

- Air atomized spray application
- Airless spray application
- Single line widths up to 36" available for airport markings.

**k Mounted Stripers**

MRL's Industry Leading Technology

Is offered in a POWERFUL selection of models.

● Model 1 - 90

### Pressure Tank Designs

Air atomized spray and airless spray models:

- 1 - 60
- 1 - 120
- 1 - 165
- 1 - 220
- 1 - 275
- 1 - 340
